Professional Summary

Results-driven MCA student at JECRC University with hands-on experience designing Business Intelligence solutions, developing interactive dashboards, and performing end-to-end data analysis. Built 10+ analytics projects across supply chain, retail, entertainment, healthcare, and food delivery domains using Power BI, PostgreSQL, MySQL, Python, and Excel. Proficient in DAX, Power Query, data modeling, EDA, KPI development, and REST API integration.

Technical Skills

Languages:	Python, SQL, JavaScript, Java, C++
Business Intelligence:	Power BI, DAX, Power Query M, Microsoft Fabric, KPI Dashboard Design, Data Modeling
Databases:	PostgreSQL, MySQL, MongoDB
Data Analytics:	Data Cleaning, EDA, Data Transformation, Data Visualization, Data Storytelling
Excel:	Advanced Excel, Pivot Tables/Charts, Power Query, Conditional Formatting, Lookup Functions
Python Libraries:	Pandas, NumPy, Matplotlib, Seaborn, SQLAlchemy
Developer Tools:	Git, GitHub, VS Code, pgAdmin, SQL Workbench

Education

Master of Computer Applications (MCA)

JECRC University, Jaipur

Aug 2025 – Aug 2027

CGPA: 8.65 / 10

Bachelor of Computer Applications (BCA)

Jai Narain Vyas University, Jodhpur

Jul 2022 – Jul 2025

Aggregate: 72.53%

Projects

Phone Analysis Dashboard | *Power BI, DAX, Power Query*

May 2026

- Designed an interactive Power BI dashboard analyzing 958 smartphone records, featuring reusable DAX measures, KPI cards, drill-through reports, bookmarks, and dynamic slicers.
- Performed Power Query transformations and visualized pricing, battery, RAM, display quality, camera specs, and 5G adoption trends across pricing segments.

Samsung Supply Chain & Logistics Dashboard | *Power BI, DAX, Star Schema*

Jun 2026

- Built an end-to-end BI dashboard covering procurement, production, inventory, logistics, and sales performance using DAX measures and star schema data modeling.
- Developed drill-down KPI reports for supplier performance, shipment status, and production efficiency to support executive decision-making.

Weather Forecast Dashboard | *Power BI, Power Query, DAX, REST API*

May 2026

- Developed a real-time weather analytics dashboard in Power BI by integrating the OpenWeatherMap API using Power Query M and DAX.
- Automated data extraction, JSON transformation, and interactive reporting for 12 Indian cities, featuring weather forecasts, AQI, KPI cards, and dynamic visualizations.

Swiggy vs Zomato Competitive Analysis | *PostgreSQL, Power BI*

May 2026

- Analyzed restaurant performance, delivery efficiency, customer ratings, and market share using advanced PostgreSQL queries with CTEs, window functions, joins, and subqueries.
- Designed interactive KPI dashboards featuring city-wise comparisons, delivery performance metrics, and revenue trend analysis.

Walmart Sales Analysis | *Python, PostgreSQL, SQL*

Jun 2026

- Built an end-to-end retail analytics pipeline: cleaned 10,051 raw transactions using Python (pandas) and loaded the data into PostgreSQL via SQLAlchemy.
- Executed 20 business SQL queries using CTEs, window functions, and aggregations to analyze sales performance, branch comparisons, payment trends, peak hours, and YoY revenue change.

Netflix Movies & TV Shows Analytics | *PostgreSQL, Excel*

Apr 2026

- Performed EDA on Netflix content using PostgreSQL with CTEs, window functions, CASE statements, UNNEST (), and STRING TO ARRAY () to analyze genre, country, rating, and content distribution trends.

Certifications

Manage and Secure Power BI — Microsoft Learn	May 2026
Manage a Microsoft Fabric Environment — Microsoft Learn	Jun 2026
Implement Real-Time Intelligence with Microsoft Fabric — Microsoft Learn	Jun 2026
Data Analytics Essentials — Cisco Networking Academy	Jun 2026
Data Analytics Projects — Great Learning	Jul 2026
